Art Unit: 3724

QUAYLE ACTION

1. The amendment filed November 25, 2002 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Election/Restriction

2. As stated in the previous Office action (paper no. 12), due to the allowability of claim 21, the restriction requirement has been withdrawn and claims 21-39 have been rejoined.

Title

3. The title of the invention is not accurate, and it is suggested to change "SYSTEM" TO --METHOD-- or the like.

Art Unit: 3724

Abstract

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The abstract of the disclosure is objected to because it is too long. / Appropriate correction is required. See MPEP § 608.01(b).

Specification

6. The disclosure is objected to because of the following informalities:

The specification contains numerous informalities, particularly with respect to correspondence between the numerals shown in the figures and those described. The following are some examples.

Art Unit: 3724

On page 26, line 20, "300" appears to be inaccurate, and it seems that it should be changed to --301-- or the like; in line 25, "306" appears to be inaccurate, and it seems that it should read --309-- or the like; in line 27, "310" appears to be inaccurate, and it seems that it should read --311--.

On page 27, line 5, "310" appears to be inaccurate, and it seems that it should be changed to --311--.

On page 28, line 3, "326" appears to be inaccurate, and it seems that it should be changed to --320--.

On page 31, lines 18 and 27, "326" appears to be inaccurate, and it seems that it should be changed to --320--.

The entire application should be reviewed for similar informalities.

Appropriate correction is required.

Allowable Subject Matter

7. Claims 21-39 are allowable over the prior art of record.

Conclusion

8. This application is in condition for allowance except for the formal matters described above.

Art Unit: 3724

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Tuesday through Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.
